

Talking with youth about marijuana: What works?

SEEKING YOUTH PARTICIPATION!

An opportunity in Calgary with the Canadian Centre on Substance Use and Addiction

As Canada moves to legalize marijuana our goal is to get people talking! No matter what your age, talking and sharing thoughts and feelings helps us in understanding different issues. To learn more about marijuana, we want people to ask questions and have honest, open conversations. We know youth want to be involved in these discussions. **Through this facilitated discussion, we want to find out what an open, honest and two-way conversation with an adult or someone you trust looks and sounds like.** Understanding youth perspectives and viewpoints is important so that adults, trusted youth allies and supporters can be well-informed and have effective conversations with youth about marijuana.

Please join us for a discussion about meaningful ways to help give adults and youth the necessary tools to have open and honest conversations about marijuana.

You will receive \$50 for your participation and free food!

WHEN: Wednesday, November 15th, 6 to 9 p.m.

WHERE: Alberta Health Services, 10301 Southport Lane SW, Calgary, Room 1002

To attend, please RSVP to:
